PAGE ONE

### WHAT YOU'LL NEED

- Cardboard tea box
- Hole punch
- Cardstock
- Tacky glue
- Duct tape in various colors
- Orange, red, and yellow tissue paper

### WHAT TO DO

**1.** With the lid closed, cut the tea box in half. Rotate so that the opening is at the top and punch holes in two opposite sides.

**2.** Cut out the templates. Trace the body pieces onto cardstock and cut out. Fold back the tabs on the wings, then sandwich two together with glue; repeat with the other pair. Glue the body, front, back and bottom to the tea box as shown, then apply glue to the wing tabs and attach to the rocket body. Punch holes through the cardstock at each opening.

**3.** To make duct tape stickers for the stripes and windows: Tape strips of tape to parchment paper, overlapping the edges slightly. Flip over, then trace the templates onto the back; cut out. Peel the parchment paper off the back and press them onto the sides of the rocket.

**4.** For tissue paper flames: Layer a few colors of tissue paper, trace the templates and cut out. Roll the large flames first and wrap the smaller ones around it; secure with tape. Glue to rocket.
