A

B

WHAT YOU'LL NEED

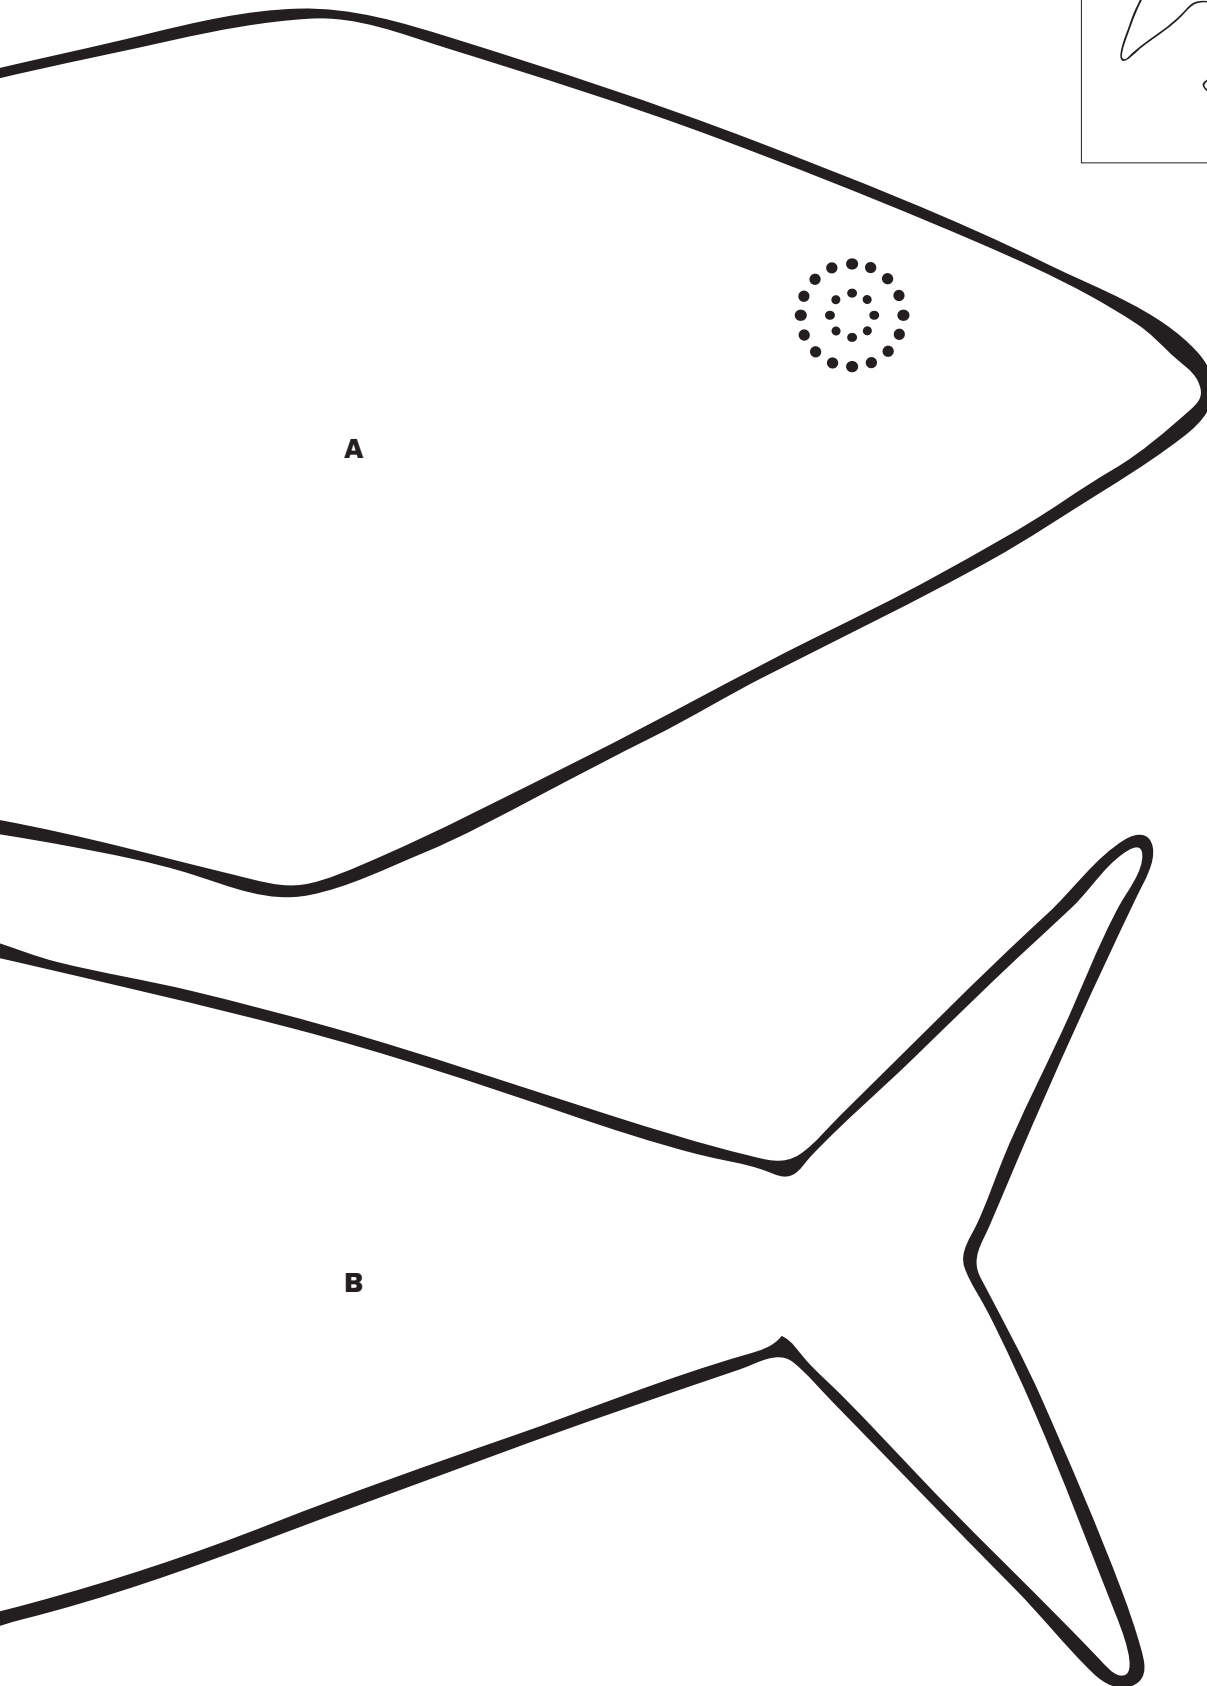

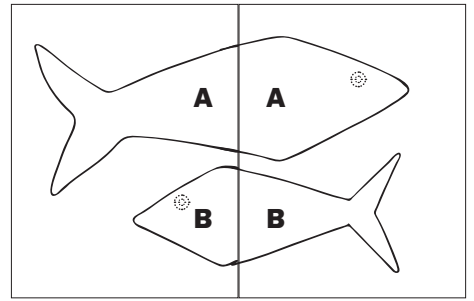

- Fabric (about $\frac{1}{4}$ yard per fish)
- Chalky colored pencil
- Kid-safe needle
- Embroidery thread
- Opaque white fabric-paint pen
- Beans or fiberfill

WHAT TO DO

1. Cut out the templates and tape them together to make whole fish. Trace onto your fabric with colored pencil, then fold the fabric in half and pin. Cut through both layers about $\frac{1}{2}$ inch outside the marking.
2. Starting at the bottom, stitch the fish together along the chalk line, leaving about 6 inches open along its belly.
3. Add the fish's features with the paint pen, letting each side dry in between. Help your child iron to set the paint per manufacturer instructions.
2. Stuff the fish with beans or fiberfill, and then stitch it all the way closed.
